

- [Azure Monitor Workbooks Overview](#) – great starting place when learning about workbooks
- [Configure a Log Analytics Workspace](#) – if you don't already have a LA workspace, use this tutorial to set one up
- [How to use Azure AD workbooks](#) - a brief write-up about most of the workbooks in the gallery
- [Microsoft Organization in GitHub](#) and [@azure-ad-workbooks](#) – join this GitHub Repo and team to learn much more about Azure AD Workbooks as well as to contribute
- [Best practices and hints for log queries](#)
- [Kusto Query Language \(KQL\) from Scratch](#) – great Pluralsight Tutorial for learning KQL
- [aka.ms/PreviewWorkbooks](#) – see Azure AD Workbooks in private preview!

Note: You must be in one of the following Azure AD roles for you to access the workbook(s):

1. Security Administrator
2. Security Reader
3. Report Reader
